

## **New External Pull Tab/No Tab Corners**

Magnolia Metal & Plastics now offers the Vinyl Saving External Pull Tab/No Tab Corner. With this corner, window manufacturers no longer need to place the inverted U-channel into the screen track before inserting the screen. According to Magnolia, the success and beauty of this product is the location of the protruded stops. OEMs enjoy the cost savings by eliminating the need for U-channel profiles during the manufacturing process. To learn more about the Vinyl Saving External Pull Tab / No Tab Corners, please contact Bob Green at Magnolia Metal & Plastic Products.
