July 11th 2007

To All Valued Customers

As we are all very aware, oil prices have continued to soar over the past several months. This continued rise has led to even more increases in resin products used in the production of our injection molded components. As a result of these cost increases we find it necessary to increase the prices of all injection molded parts by 8% effective for new orders received for shipment on or after August 10, 2007. Due to limited inventory of on hand resin we must limit order sizes to your approximate average monthly order size.

As always we will strive to obtain the highest quality raw materials at the very best cost possible, and maintain the superior service levels that you our valued customers have come to expect from us.

Should you have any questions, please feel free to contact me or any of my staff.

Sincerely,

Tony Malik

President
